

An aerial rendering of the University of Mary Athletics Complex. The complex features a large, white, dome-shaped stadium with blue and orange accents, a football field with "MARAUDERS" and "UMARY" branding, and a large, modern building with a brown roof. The complex is surrounded by green fields, parking lots, and a road. The background shows a vast, flat landscape with distant hills.

BUILDING A NEW ERA OF GREATNESS

We get it: Nothing says 'welcome to campus' like construction cones and piles of dirt — but wait until you see what's coming!

Pardon Our Progress

Last spring, the University of Mary broke ground on our new Athletics Complex and Master Landscaping Plan, a transformative project that will bring football, soccer, softball, and track & field competition back to campus, combining a true home-field advantage for Marauders scholar-athletes with innovative academic facilities, a beautification of the east side of campus, and new opportunities for engagement.

A Homecoming for Marauders Athletics

For decades, our athletic teams have competed at venues across Bismarck. With the completion of the Marauders Athletics Complex in **Fall 2027**, these programs will finally return to campus, bringing an electric game-day atmosphere to the university.

**The Multipurpose Sports Dome:
A Year-Round Game-Changer**

We are building a Multipurpose Sports Dome — the biggest in the state! — that will serve as the home venue for both soccer and softball and provide year-round training, competition, and recreational space for University of Mary scholar-athletes, our student body at large, and the broader Bismarck-Mandan community in every season.

**The Research and Performance Center:
A Dynamic Hub of Competition and Learning**

At the heart of the new complex, the Research and Performance Center (RPC) incorporates state-of-the-art classroom space for students in the Saint Gianna School of Health Sciences that transforms into premium suite seating, offering unparalleled views and an exclusive game-day experience; space for strength and conditioning, sports medicine, and nutrition; and grandstand seating for approximately 2,500 Marauders football fans.

Patience Pays Off

The Marauders Athletics Complex is a key component of Phase II of the University of Mary's ambitious \$272-million Vision 2030 Capital Campaign and a testament to the imagination, trust, and generosity of our benefactors.

We know construction isn't easiest to navigate but it's part of something much bigger. We invite you to look past the fences and noise and catch a glimpse of the incredible future we're building together — thanks to the bold vision and support of those who believe in what's next!

For more information or to support this project financially, visit www.umary.edu/AthleticsComplex.

For everyone's safety, we respectfully ask students, employees, and visitors to avoid the construction site while work is underway.
